IMPROVE.

EMPOWER.

RENEW.

Multiple sclerosis (MS) is an unpredictable disease of the central nervous system that disrupts information shared between the brain and body. Depending on the extent and location of damage, a wide variety of symptoms are experienced.

Symptoms of MS:

- Chronic fatigue
- Cognitive changes
 - *Attention, memory, and slowed thinking*
- Muscle weakness, balance issues
- Numbness, tingling
- Visual changes
- Speech and swallowing problems
- Emotional changes
- Word finding difficulties
- Trouble reasoning
- Feeling overwhelmed by tasks

Improve management skills:

- Strategies for memory
- Problem solving and safety
- Routines for rest and self-care
- Balance of time and energy
- Understanding diagnosis and symptoms
- Strategies for attention and concentration
- Planning accordingly for home and health
- Executive functioning
 - *Planning, organization, initiation, and completion*
- Ability to shift between tasks
- Word finding

Our therapy goes beyond typical expectations.

We offer services that improve functioning, empower individuals, and renew lives.

We develop a customized plan to achieve client-driven goals.

At Progressive Therapy Associates, we help individuals reach their potential. We understand the daily challenges and frustrations. Our customized approach balances both education and support, while developing the functional skills needed for everyday life.
